IN TOUCH with our planet

Water is life and our passion. We create inspiring moments while protecting this precious element: with **water- and energy-saving showers, faucets, and technologies**. However, the production and disposal of our products also have an impact on the climate and resource cycles of our planet, for which we take responsibility.

OUR PATH to green transformation

Life cycle analysis of a hand shower

The usage phase of a hand shower is by far the most CO₂-intensive. Approximately **1,000 times more** CO₂ is emitted than during the production. That is why we see it as our mission to adjust our entire shower and faucet range to "ECO" by 2030. In concrete terms, this means that we will reduce the water and/or energy consumption of water-bearing products in usage by at least 22 percent compared to the 2020 base year.

Our contribution to protecting our planet

Hansgrohe preserves water

Safe, fresh water is a valuable, unevenly distributed resource. It is vital that it is used sparingly in regions where there are water shortages. However, even in water-rich areas, constant investment in its treatment is essential. Thanks to our water-saving products, we preserve water cycles without compromising the shower experience.

Hansgrohe protects the climate

Our products are friendly and support the goals of the Paris and Glasgow Climate Summits. But more importantly: the use of warm water requires a lot of energy. Saving water using our products also means reducing the energy consumption of sanitary facilities and thereby protecting the environment.

Hansgrohe will be part of the circular economy

Each resource that no longer needs to be obtained, but rather can be recycled, preserves our ecosystem and saves energy and water in our production lines. We are developing long-lasting, repairable, and recyclable products and sustainable packaging, and are working towards using materials that will preserve our ecosystem as much as possible.

Delight in saving water

Replacing a standard hand shower with a water-saving version is worthwhile. Thanks to our EcoSmart technology saves up to 40 percent more water than our conventional products. With EcoSmart+, this figure goes all the way up to 60 percent. By saving water, less heat energy is required, which also reduces gas and electricity bills.

Our water savings calculator determines how many resources you can save with our EcoSmart shower – without compromising showering pleasure. The following sample calculation applies to a family of four and assumes that each family member showers for five minutes a day (2022, costs suggested here are the average for GER).

Would you like to try the water savings calculator yourself? On our website [hansgrohe.com/water-savings-calculator](https://www.hansgrohe.com/water-savings-calculator), you can enter your data, select the product of your choice and calculate your potential savings.

The difference you can make

Showering with the Raindance Select S hand shower 120 3jet EcoSmart 9 l/min.

3 trees

could be watered for one year with your saving of 47,449 liters.

Our green company initiatives

10 initiatives with concrete objectives and projects that focus on the three fields of action for the protection of our planet:

THE BATHROOM

that fits your life

When you imagine your dream bathroom, what does it look like? Or, even more importantly, what does it feel like? With our range of new, inspiring products, hansgrohe encourages you to find the answer. **Your answer.**

Bath products that will make your heart sing

The bathroom is one of the most important rooms and is more than just a place for showering, washing hands, or brushing teeth. It is an oasis of retreat and relaxation. At the same time, every bathroom is as unique as the personality for which it is made. hansgrohe products give you complete freedom in designing your dream bathroom. Design, quality, and comfort combine with numerous options for individual adaptation to everyday needs to create incomparable water experiences that will become an integral part of your daily life and make you truly feel alive.

Individual bathroom design with showers, faucets, and thermostats by hansgrohe

The demands placed on modern bathroom planning have long since gone beyond pure functionality. In addition to innovative technology for responsible water enjoyment, the focus is on ergonomic comfort and aesthetic pleasure. That's why we are constantly working on the development of new products that will bring your bathroom dreams to life. Be inspired by our extensive range and easily find your favorite products to create your very own well-being oasis.

 Our sustainable solutions combine water- and energy-saving technologies, intelligent functions, and long-lasting quality. In this way, we take **responsibility for people, the environment, and our planet.** 

With **Pulsify**, you can transform your shower into your new favorite place. Choose between two impressive designs – round and soft (S) or angular and cubic (E) – and look forward to a sensual shower experience thanks to the PowderRain spray type.

The new **iBox universal 2** ensures fast, more flexible, and safe installation. The intelligent concealed solution offers a wide range of combination options and is the perfect complement to the **ShowerSelect Comfort** finish set.

Tecturis impresses with clean lines and is available in two different designs. Whether soft and flowing (S) or clear and angular (E), the architectural faucet line lets you showcase your personal style down to the smallest detail.

PULSIFY

Thanks to two unique designs, Pulsify will turn your shower into your favorite place – no matter the size of your bathroom. Meanwhile, PowderRain envelops you in a sensual, sustainable showering experience with microfine droplets.

FEEL PULSIFIED

Round or square? You decide! With Pulsify S and Pulsify E, you can individualize the look of your bathroom and enjoy a unique shower experience in its most beautiful form - your most beautiful form. The modern and timeless design makes Pulsify a true style highlight in your bathroom. Make your statement and feel like never before: Pulsified!

Pulsify S

Enjoy a great shower, no matter the space

Whether your bathroom is big, tiny, narrow, or wide - Pulsify S offers pure showering pleasure and fits in perfectly anywhere. The broad range of Pulsify S products offers you a consistent design language that fits in with any bathroom and any style. And the extensive product variety also perfectly complements the look of your bathroom.

Catches the eye, touches the heart

Its modern, round design and timeless look make Pulsify S a true style statement in your bathroom, presenting a consistent solution for the entire shower area with round overhead and hand showers, cylindrical wall bars, and shower pipes. The surface is available in various options: Chrome, Matt Black, Matt White, and Brushed Bronze

More storage, more fun

Enjoy your Pulsify S to the fullest with plenty of storage space integrated onto the shower pipe for all your essentials. And, if you want even more space, you can expand your shower experience with WallStoris - for plentiful storage options and a matching design language. The flexible storage system can be conveniently glued on without drilling into the wall or tiles. Just create your perfect combination.

Pulsify E

Showering pleasure in its purest form

Meet Pulsify E. The shower that brings you full PowderRain pleasure in a minimalist cubic design and highlights your individual preferences. Make your shower more than just a shower. Make it a unique expression of your style.

Unique design with wow factor

The iconic, cubic design underlines the character of Pulsify E and makes it a real eye-catcher in any bathroom. The consistent design language runs through the entire range, right down to the smallest details. Highlights can be set in the finishes Chrome, Matt Black, Matt White, and Brushed Bronze.

It's all about style – your style

With the wide Pulsify E shower range, you enjoy one consistent design language from overhead and hand showers to wall bars and shower arms. The exceptional look and feel of your individual bathroom style is perfectly complemented by our extensive product range.

TRANSFORMS

water into well-being

Whether refreshing or relaxing, soft or intense – Pulsify S and Pulsify E take your shower experience to the next level. With outstanding design, long-lasting quality and joyful sustainability. And, if you ever feel like adding a new spray type to your shower experience, you can simply choose between different variants. Looking for a gentle, relaxing shower? Then PowderRain is just right for you.

Thousands of microfine droplets for a one-of-a-kind feeling. Renew your daily routine and yourself with **PowderRain**, a shower experience that is the true highlight of your day. Every day.

9 out of 10 consumers
confirm that Pulsify EcoSmart
provides a **great**
shower experience
with 40%
water savings.

* Source: TRND customer study with 150 testers, July 2022.
Water savings compared to the hansgrohe average.

Feels good for you – and for the environment

Water is a limited resource. That is why every Pulsify shower allows for conscious usage of water. Compared to our conventional showers, which use over 15 l/min, hansgrohe's EcoSmart variant reduces water consumption by up to 40% (8 liters per minute) and the EcoSmart+ variants even by up to 60% (6 liters per minute). This way, you shower particularly sustainably and save valuable resources while enjoying the same comfort.

Pulsify at a glance

- PowderRain offers a gentle, relaxing shower experience
- Compared to our conventional showers with an average water consumption of 15 l/min, hansgrohe showers with EcoSmart and EcoSmart+ reduce water consumption by up to 40% (8 l/min) and 60% (6 l/min)
- Convenient control of the spray types thanks to Select
- FastDrain minimizes annoying dripping and limescale stains
- Water Flow Control enables responsible water use
- QuickClean ensures easy cleaning
- Available in four finishes: Chrome, Matt Black, Matt White, and Brushed Bronze

Small details, big impact:
The **warm and cotton-
like look** of the new
hansgrohe Designflex shower
hose updates your bathroom
and gives it a **modern
spa touch**.

DESIGNFLEX:

flexible, lightweight, stylish

Showering with that something extra

Thanks to its warm, cotton-like look and pleasant feel, Designflex adds the perfect finishing touch to your bathroom design and enhances the comfortable atmosphere. The look and feel of your shower transform it into a cozy oasis of well-being. The Designflex shower hoses unique look is the result of the innovative braiding technology, through which multicolored threads are closely braided – safe, water-resistant, and the perfect addition to all FinishPlus surfaces.

Designflex fibers are made from **recycled plastic bottles.** This makes Designflex a **contemporary design piece** and a **contribution to sustainable living.**

Designflex at a glance

- Pleasant haptics make you feel good in the shower
- About 30% lighter in weight than other hansgrohe shower hoses
- Resistant materials ensure the highest product quality
- Kink-free showering pleasure: The rotatable connector prevents annoying tangling
- Compatible with all common hand showers
- Waterproof and water-repellent material guarantees the best hygienic conditions and easy cleaning
- Perfect addition to all FinishPlus surfaces

SHOWER- SELECT COMFORT

Happiness at the touch of a button: ShowerSelect Comfort features high-quality design and allows for **convenient water control**. Thanks to the flat, space-saving appearance, you can turn your bathroom into a place of peace and quiet.

A WORK OF ART for the wall

As the saying goes: Less is more. The elegant, purist design of ShowerSelect Comfort creates an artistic eye-catcher in your shower and enables intuitive operation of all shower elements. With just one click, you can precisely start or stop the flow of water, switch from hand shower to overhead shower, or change the spray type. The ShowerSelect Comfort thermostat continuously balances out any

temperature and water pressure fluctuations, so you can always enjoy the best showering experience by maintaining a constant water temperature and volume. The intuitive Select buttons with easy-to-understand and abrasion-resistant symbols simplify operation and are easy to clean thanks to their flush-mounted design. In addition, the clear and stylish temperature markings also make setting your personal comfort temperature a breeze. There is also an extra safety feature: The SafetyStop

function for adjustable temperature limitation. Accordingly, you can be sure that the water in your shower never gets too hot (lock at 40 degrees). This can be released with the push of a button on the control dial and guarantees safety for your little ones. At the same time, Water Flow Control allows you to effortlessly reduce water consumption and thus save resources.

The new iBox universal 2 – faster, smarter, more flexible

Designed to upgrade your bathroom

ShowerSelect Comfort ready-made sets and controls can be integrated into any space. The flat and sophisticated design fits perfectly into your bathroom and creates more room for cozy showering comfort. Thanks to the shadow gap, it even looks as if the thermostat is floating in front of the wall. Design enthusiasts appreciate the visual lightness offered by this installation. Also, the handles have a flat design and are centered at the same height. And the high-quality metal offer durability and provide a convenient operating feeling.

The thermostats can be quickly and easily installed on the new iBox universal 2. If you ever want to change the shape and color of the faucet, the iBox universal 2 allows you to replace the ShowerSelect Comfort unit at any time and without much effort.

iBox universal 2

The basic body for concealed fittings can be installed even more flexibly and conveniently.

ShowerSelect Comfort

Control your showering pleasure conveniently and intuitively thanks to the minimalist concealed thermostat with the Select function.

ShowerSelect Comfort at a glance

- Intuitive control by up to four consumers at the touch of a button thanks to the Select function
- Full-surface metal Select buttons make it easy to operate the desired shower head
- Comfortable temperature setting thanks to the thermostat with SafetyStop
- Integrated Water Flow Control function for sustainable use of water and regulation of water flow
- Easy cleaning is ensured by flush-mounted buttons
- Available in three shapes: Square, Softcube, and Round
- Comes in five finishes: Chrome, Matt Black, Matt White, Brushed Black Chrome, and Brushed Bronze
- Installation based on the new iBox universal 2

DUOTURN

A **first-class shower experience** with just one turn: DuoTurn concealed mixers are characterized by their intuitive handling and can be integrated into **any bathroom.**

Turn up the COMFORT

For moments of rest. For moments of silence. For moments of relaxation. DuoTurn combines intuitive handling with clear, flat design and lets you forget about everyday life and turn on soothing comfort while showering. The concealed mixers can be installed with the bathtub as well as in the shower and offer a new, uncomplicated alternative to a diverter with a pull mechanism. Thanks to DuoTurn, you can switch from the overhead shower to the hand shower or simply set your desired temperature and volume flow control with just one turn. The mixers also feature an attractive overall appearance. The cartridge is positioned centrally, and the handles are flat and aligned at one height.

The new iBox universal 2 -
reduces complexity
and allows for
easy installation

The feeling of relaxation requires one thing above all: A pleasant atmosphere. In combination with the iBox universal 2, the innovative hansgrohe technology can be placed behind the wall, creating a minimalist ambience in the bathroom where you can look forward to relaxing shower experiences. The concealed unit is easy to install on the iBox universal 2. This allows the faucet to be replaced in just a few simple steps if you ever want to change the shape or color.

DuoTurn at a glance

- Convenient temperature setting and volume flow control
- Comfortable control of up to two consumers by operating the lever
- Easy cleaning thanks to the flat, built-in surface
- Available in three shapes: Square, Softcube, and Round
- Comes in three finishes: Chrome, Matt Black, and Matt White
- Installation based on the new iBox universal 2

IBOX UNIVERSAL 2

The new iBox universal 2 offers **reduced complexity** and enables a **fast, more flexible,** and **secure installation.**

HELLO FUTURE!

The new hansgrohe iBox universal 2 –
faster, smarter, more flexible

Efficient installation offering maximum flexibility

The latest evolution of the iBox universal draws on decades of experience with over 11 million installed products and continuous feedback from installers and planners. As a result, the new iBox universal 2 reduces complexity while enabling fast, error-free, universal installation. It combines the proven advantages of its predecessor with new features and benefits.

Specialists are facing increasing time pressure. This is further aggravated by a shortage of skilled workers. Therefore, a partner who understands these challenges and offers products that enable safe and quick installation is needed. The new iBox generation is one more example of how we use innovative ideas and intelligent developments to make installers' work more efficient, while simultaneously boosting their customers' satisfaction.

The installation of the iBox universal 2 in combination with new finish sets is **twice as fast as with the previous model** and works even more intelligently and flexibly.

Useful information for professionals

The iBox universal 2 features a high level of safety and reliability thanks to over 22 years of experience and targeted further development. The improved product benefits and functions make installation easier than ever before. This means that installation errors can be prevented, and installers benefit from the efficiency and time savings gained. In addition, intelligent details result in more installation options.

Useful information for consumers

The new iBox generation guarantees maximum design freedom in the bathroom, as it can be combined with all hansgrohe finish sets. With older lines, only an adapter plate is required for installation. In addition, the concealed installation requires very little space and allows for easy cleaning. And, thanks to the excellent sound absorption, consumers can look forward to a quiet and peaceful showering experience.

Five benefits of the iBox universal 2

Sliding sleeve

Installation without cutting: The sliding sleeve is very easy to slide in, regardless of the depth at which the concealed box is installed. This makes the waterproof box even easier, faster, and safer to install.

Mounting ring

The integrated mounting ring allows the box to be installed in, on, or in front of the wall. The ring can be attached at the front or rear and allows for mounting with any type of installation.

Pre-mounted seal

The sealing sleeve is permanently attached to the sliding sleeve so that it cannot be lost or forgotten. This also simplifies installation as everything is always at hand. The sleeve is continuously elastic and waterproof.

Box made of EPP foam

The Box is made of expanded polypropylene (EPP foam). This sustainable material provides perfect sound absorption and thermal insulation. The versatile material is also lightweight, waterproof, and easy to recycle.

Pre-installed function block

The high-quality function block is manufactured using metal and delivered pre-installed. This enables fast and safe installation.

Faster installation, more mounting options, fewer installation steps - that makes the new generation of iBox even more efficient, more flexible, and safer.

New sliding sleeve - nothing to cut

Multiple fixation options thanks to new mounting ring

Integrated circular level reduces correction efforts and avoids installation errors

Fewer errors and less complexity thanks to rotational symmetry (all connections are the same)

Empty electrical conduit options (e.g., for future-oriented finish sets that require electricity)

Common installation depth (80 mm - 108 mm)

Suitable for standard pipe dimensions thanks to 4 Rp 1/2 connections

Easy alignment through dust cover with stable supports for spirit level

EPP (expanded polypropylene) foam sheathing offers excellent thermal insulation

Pre-mounted seal - so nothing gets lost

Frontal view of the iBox universal 2

The perfect combination – the iBox universal 2 and ShowerSelect Comfort

iBox universal 2 at a glance

- Fast, flexible, and safe assembly
- Improved installation options thanks to intelligent details
- Fully waterproof and universal
- Acoustic decoupling means all new finish sets have noise class 1
- Can be combined with all previous and future hansgrohe and AXOR finish sets (for older lines, an adapter plate is necessary)
- Finish sets require little space and offer a wide range of products (various colors, shapes, and numbers of consumers available)

TECTURIS

Embracing water with architectural design: With Tecturis, you are the **architect of your well-being**. Plus, an outstanding space needs an outstanding faucet.

DESIGNED for water – created for you

Surround yourself with outstanding design and positive energy will flow. Inspired by the pure and functional beauty of water, Tecturis embraces your everyday water experience with clear lines, defined shapes, and maximum comfort. This is what water has been dreaming of.

One style icon – two iconic designs

Geometrically shaped and round like concentric water circles or straight like a steady stream of water. With Tecturis, hansgrohe has created two designs that reflect these aesthetics and highlight the pure and functional beauty of water through their minimalist appearance. From the handle to the body to the spout, Tecturis features exceptional hansgrohe design and high quality standards. There is a right solution for every design lover's bathroom and style. You decide which line suits you and your bathroom best.

The two styles embody the different characters of water – **Tecturis S for the soft and flowing** and **Tecturis E for the clear and powerful.**

Tecturis S

Soft lines, rounded design, and smooth surfaces for a feeling of relaxation, comfort, and well-being – that's the style of the Tecturis S. Inspired by the flowing character of water, its soft appeal also reflects your relaxed style and turns any bathroom into a wellness oasis. Its slim look and raised ComfortZone create more space for you.

Leaves nothing but a good feeling: The handle on the side prevents water spots and limescale on the spout. This way, your favorite faucet always keeps its clean look.

Tecturis E

Tecturis E features clear, geometrical design that highlights the purity of water. Its cubic water spray is a tangible expression of the steady nature of water. Square shapes and the perfect integration of the round cartridge create a highly aesthetic atmosphere, making your WashPlace a remarkable design statement.

A real **MUST-HAVE** - for the planet as well

Great architectural design takes the environment into account. Equipped with EcoSmart+, your Tecturis faucet significantly reduces water consumption to only 4 l/minute at 3 bar - without reducing the joy of use. In addition, CoolStart technology saves energy and supports an even more sustainable life. Often, we open a faucet automatically with the handle in the middle position - and with that, we consume hot water without noticing it. In contrast to standard faucets, pure cold water flows in this position with CoolStart. The energy required for heating water is only accessed when you actively move the faucet handle to the left. Using hot water only when it is really needed is good for the environment. And for your sense of well-being.

Tecturis at a glance

- Reduced design: Minimalist from handle to body to spout
- Two design languages: Soft and round (S) and straight and angular (E)
- Available in various versions, e.g., with side or top operation, as a two-hole wall-mounted faucet or two-hole ceramic faucet, as well as with different ComfortZones
- Available in four FinishPlus surfaces: Chrome, Matt Black, Matt White, and Brushed Bronze
- Minimization of water splashes and limescale deposits ensures easy cleaning
- EcoSmart+ reduces water consumption to only 4 l/minute at 3 bar and saves valuable resources
- Intuitive energy saving thanks to CoolStart: Cold water flows when handle is in middle position

AQITTURA M91

Aqittura M91 serves you water the way you like it best: **filtered and optimized,** optionally **treated with minerals, carbonated** and **chilled** if desired.

ENJOYING WATER

without compromises

Water is probably the most important resource on Earth. Anyone with access to clean drinking water enjoys a high quality of life. However, in some regions, the water quality is less enjoyable. To ensure that you can always enjoy your drinking water to the fullest, we have developed the Aqittura M91.

Thanks to the exclusive faucet with integrated system, you get to enjoy delicious water, individually refined according to your preferences, directly from the tap. This way, you can avoid the inconvenient transport of water bottles while at the same time protecting the environment.

Reliable reduction of pollutants and microplastics

The filtration of the Aqittura M91 system removes up to 95%* of pollutants and heavy metals, pesticides and insecticides. This makes the enjoyment of water even more carefree and safe, and contributes to a holistic balance. The activated carbon filter of the Aqittura M91 system also filters microplastic particles from drinking water. Organic substances such as natural odors and flavors or acids are also neutralized for worry-free water enjoyment.

For separate supply of filtered and unfiltered water, the faucet is equipped with two outlets.

*Average of seven representative pollutants (pesticides and pharmaceutical residues), determined by the Zurich University of Applied Sciences (ZHAW)

FilterSystem vs. SodaSystem

Find the system that suits you

Aqittura M91 is available in two system versions. With the Aqittura M91 SodaSystem, you experience all the benefits and can enjoy your water filtered, mineralized, and carbonated as well as chilled between 4 and 12 degrees in sparkling, medium, or still. The adjustment Carbonation is adjusted at the push of a button right at the faucet. In addition, the system can be managed via the hansgrohe home app. If you are happy without carbonation and refrigeration and only want the water to be filtered and mineralized, the Aqittura M91 FilterSystem is the right choice for you.

The **FilterSystem** provides you with filtered or mineralized water at the push of a button. Thanks to the integrated valve, the treated water runs as long as you keep the button pressed. In addition, the space-saving holder makes it easy to install the mineralizing filter in the kitchen sink cabinet.

Using the intuitive control element of the **SodaSystem**, you choose how you want to enjoy your water: sparkling, medium, or still. The SodaBase in the kitchen sink cabinet integrates the carbonic acid cartridge, the mineralization filter, the intermediate storage tank for treated water, and the cooling unit.

THE INTELLIGENT carbonation and filter system for the kitchen

SodaBase – the core of the Aqittura M91 SodaSystem

All functions in a compact space: With a height of 476 mm, a width of 200 mm, and a depth of 500 mm, the SodaBase fits into any kitchen cabinet with a width of at least 400 mm. A swiveling threaded connection is built into the SodaBase, so that all commercially available CO₂ bottles from various manufacturers can be connected in a few simple steps and without tools. A CO₂ bottle (425 g for approx. 60 l of sparkling water) is always included with the purchase of a hansgrohe Aqittura M91 SodaSystem and is the entry into the deposit system.

Discover all of the benefits using the hansgrohe home app

With the Aqittura M91 SodaSystem, you can use all of the digital possibilities of our kitchen innovation. The hansgrohe home app allows you to control the smart kitchen faucet from anywhere and enjoy numerous convenience functions.

- Easy operation via smartphone
- Digital filter and carbon dioxide level indicator
- Notification to app users: Fill levels, cleaning, software updates, error messages
- Repurchase of filters and other spare parts via specialist retailers or common online shops
- Know more: The app includes the instruction manual and FAQs

A balanced mineral supply for your well-being

The unique MINTEC® filtration and mineralization technology ensures a continuous supply of valuable minerals. The individually adjusted composition of minerals forms an important contribution to a harmonious diet, has a compensating effect on the mineral balance. Optimize your personal water balance with mineral salts such as magnesium, calcium, potassium, and sodium.

Full power: Mineralization and the "Life" filter

Calcium, magnesium, and potassium are added to very soft water via the "Life" mineralizing filter. Calcium is an indispensable component of a balanced diet. It supports the metabolism, is needed for building teeth and bones, and transmits nerve impulses. Enrichment with a combination of calcium, magnesium, and potassium makes tap water an effective nutritional building block.

Soft balance: Mineralization and the "Harmony" filter

Being thirsty is a natural warning signal of the body that points out the lack of vital minerals in the blood. The "Harmony" mineralizing filter adds magnesium and potassium to tap water. Magnesium supports the body's metabolic functions, while potassium regulates blood pressure and muscle and nerve function.

Vitality: Mineralization and the "Sport" filter

The "Sport" mineralizing filter is adapted to a sporty lifestyle. On hot days or when playing sports, the body loses not only large amounts of fluid, but also valuable minerals. For athletes, along with potassium and magnesium, sodium is an important building block for maintaining tissue tension, regulating water balance in the body, transmitting nerve impulses, and regulating blood pressure, and it can help reduce muscle cramps.

Aqittura M91 at a glance

- Water according to your taste thanks to FilterSystem or SodaSystem
- Two design variants: swivel spout in L-design or curved shape with pull-out function
- Filtration reduces pollutants and microplastics
- MINTEC® ensures supply of valuable minerals
- Two separate water paths for untreated and treated water
- Available in three finishes: Matt Black, Chrome, and Stainless Steel Finish

Kitchen

Technologies

Comfort Zone
Ensures maximum freedom of movement at the sink, both in height and in the lateral swivel range.

hansgrohe home App
The app provides important information about the kitchen mixer. It informs you about fill levels and more.

Memory Function
This allows drinking vessels to be filled individually and precisely. The water flow stops automatically.

Pull-out
A pull-out shower or spout greatly extends the radius of action at the sink.

Push
Filtered or mineralised water comes out of this user-friendly kitchen mixer at the touch of a button.

Quick Clean
Limescale deposits and dirt can simply be rubbed off with a finger. For less cleaning effort.

sBox Kitchen
Smooth and protected guidance of the hose. The pull-out shower can be extended up to 76 cm.

Select
One press of a button is all it takes to regulate the flow of water at the sink.

Select Digital
At the touch of a button, treated water comes out of the mixer, either still, medium or sparkling.

Two Outlets
Separate lines for treated and untreated water provide safety when tapping.

Spray modes

Laminar Spray
Crystal-clear spray for the sink with no air mixed in, perfect for quickly filling vessels.

Stainless Steel Finish

Showers, Thermostats & Mixers

Technologies

The angle of the overhead shower can be adjusted and the water spray can be individually adapted.

Mixes air into the water. For a soft, less splashing water jet and full, light drops.

For requirements at any height - so the mixer fits perfectly into the desired washbasin situation.

Thermostatic mixer with innovative cooling technology to prevent scalding and stop it from feeling uncomfortable to touch.

Environmentally friendly mixer that conserves valuable resources, reduces CO₂ emissions and cuts costs.

Quick and safe installation - several features ensure easy installation.

Shower that uses up to 40% less water than a conventional model, also reducing energy costs.

This economical shower consumes up to 60% less water than conventional models. This also reduces energy costs.

Climate-protecting fitting that consumes only 4 l/min at 3 bar. Less water - less energy consumption.

The shower's quick emptying function reduces the dripping time after showering.

The height of the hand shower can be singlehandedly and smoothly shifted at the touch of a button.

Limescale deposits and dirt can simply be rubbed off with a finger. For less cleaning effort.

The bath filler can be swivelled under the thermostatic mixer when not in use. Nice and tidy.

Safety lock at over 40 °C - temperature limit, which prevents excessively hot water from escaping.

A playful way to control the water flow, shower or spray type at the simple touch of a button.

The high-quality installation set has a pre-assembled sealing fleece and is 100% waterproof.

Actively regulate water consumption - the amount of water can be adjusted using the control dial.

Large-scale distribution of the water in the shower so that the whole body is cocooned in feel-good droplets.

Spray modes

Intense spray consisting of thousands of micro-fine droplets. Thorough, soothing and low-splash.

Powerful, stimulating water sprays that wash away tiredness and leave people feeling fighting fit.

Invigorating, concentrated spray for the home spa that allows the day's stresses to simply drain off.

Targeted spray that gently relaxes for soothing wellness moments.

Relaxing, micro-fine droplets that softly and silently cocoon the body. For sensual showering.
